

Mitsubishi Electric Europe awards prizes to winners of ‘Best HMI Screen’ competition

Ratingen, Germany 14th March 2013.

Mitsubishi Electric Europe has announced the three winners of its “Best HMI screen competition” – two from Italy and one from the Czech Republic. The hugely popular and successful competition was held to find the most creative use of HMI screens in an application, with each winner receiving a Samsung tablet as a prize.

The “Best HMI screen competition” ran through the Autumn and Winter of 2012 and Mitsubishi Electric received entries from across Europe, highlighting the very best applications of HMI technology.

Indicative of the quality of entries, and one of the three winners, was Czech Republic agricultural machine specialist CIMBRIA, which was awarded its prize for an HMI implementation on its range of Centriccoaters. These seed treatment machines were praised by the judges for their use of HMI screens to deliver an advanced level of machine control in a very user-friendly manner. The prize was handed over to Cimbria HMD s.r.o. project engineer Libor Pávek by Lukasz Senddecki, Marketing Team leader, of Mitsubishi Electric Europe Polish Branch
